HDD Hole Opener Spec Sheet

Far Eastern Drilling

This parameter is for reference only.For accurate parameters pls confirm with technical department.

Design Specifications	
Bit Size:	**13" (330.2mm)**
Cutter Type:	**TCI Tricone bit**
Thread Connection:	**NC38**
IADC Code:	**IADC637**
Bearing Type:	**Elastomer Sealed Bearing Roller Cutters**
Roller Cutter Quantity:	**3**
Overall Length:(mm)	**1600**
Production Standard:	**API**
Operating Parameters	
RPM (r/min):	**180-60**
WOB (KN):	**0.30-0.95**
Formation:	**Hard formations for high compressive strength,such as sandstone,hard shale,dolomite,hard gypsum,chert,granite,etc.**

Company Profile

We specialize in research and production of rock drilling bits, mainly includes tricone bits,PDC bits, HDD hole opener, foundation roller cutters and related tools, application fields includes oil well drilling, gas well drilling.geothermal well drilling, mining. geological survey,hydrographic survey, water well drilling,HDD pipeline installation, foundation piling.

Specialized in hard formation for oil well.Excellent drilling speed & long life-span using
